

Environmental Policy

Business Systems International Ltd is committed to supplying Computer Hardware, software and services to its clients across the globe in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We operate in compliance with all relevant environmental legislation and we constantly strive to use pollution prevention and environmental best practices at all times.

We endeavour to:

- Integrate the consideration of environmental concerns and impacts into all of our decision making and activities;
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner;
- Reduce waste through re-use and recycling and by purchasing recycled, recyclable or re-furnished products and materials where these alternatives are available, economical and suitable;
- Encourage efficient use of materials and resources throughout our office including water, electricity, and other resources, particularly those that are non-renewable;
- Purchase and use environmentally responsible products accordingly;
- Communicate our environmental commitment to clients, suppliers and the public and encourage them to support it;
- Reduce unnecessary use of transport, encourage car sharing, and the use of alternative means of transport, such as bicycles etc. We have a company policy of not providing company cars as this increases the use of vehicles to and from the work place instead of using public transport.
- Encourage the use of new technology internally to minimise the environmental impact; and,
- Continually monitor our environmental footprint in order to identify areas of improvement.

Daniel Goodman
Managing Director
